Summary

Software Engineer with over 5 years of experience specializing in **.NET**, **React**, and the **Azure** ecosystem. Active contributor to architectural design discussions for building robust and scalable systems using **microservices** and **event-driven** architectural patterns. Proven track record of modernizing legacy applications by migrating them to the cloud, reducing on-premises infrastructure costs, and improving scalability and performance.

Work Experience

Software Engineer II [Globant](#)

Medellín, May 2025 – Present

- Refactored a heavily concurrent processing application to generate reports and deliver them using **Service Bus**, and **SendGrid** removing an On-premise SMTP server avoiding email loss and reducing costs.
- Implemented key components of a debt collection queue system with **.NET** and **React**, enabling efficient task distribution to agents for borrower's payment recovery.
- Actively participated in technical discussions to design and refine tickets with clear and feasible requirements.

Software Engineer II [WIGA](#)

Medellín, July 2023 – May 2025

- Contributed to the development of a warehouse management system using **.NET**, **Angular**, **Android Studio**, and **MSSQL Server**, integrating RFID technology to track inventory products.
- Contributed to the design and implementation a robust **microservices** architecture and **event-driven** design using Serverless approach with **Azure Functions**, and **Event Hub for a WMS** system.
- Implemented real-time message streaming for RFID tag reading using **Azure Event Hub** and managed concurrency efficiently with **Event Grid**, ensuring low-latency processing and high scalability.

Software Engineer [Bouquet Collection](#)

Miami, July 2022 – July 2023

- Developed a communication system for production planning using **React**, **.NET**, **Docker**, and **MSSQL Server**, implementing **WebSockets** with **SignalR**.
- Implemented a **microservices** architecture deployed on **Azure**, achieving a **30%** reduction in planning times and a **40%** reduction in production times.
- Implemented **Azure** pipelines for Unit testing, and Automated Build and push **Docker** images to **ACR**.

Software Engineer [Twelve](#)

Medellín, March 2022 – July 2022

- Participated in creating an ERP for external companies using technologies like **React**, **.NET**, **MongoDB**, and **Docker**, implementing **Headless** architectures deployed on **Azure**.

Software Engineer [Pagame](#)

Medellín, May 2021 - June 2022

- Contributed to the migration of a monolithic **Spring Boot** architecture application to a **microservices** one.

Education

- Bachelor's degree in **systems engineering** from **EAFIT** Medellín 2023.
- **Certifications:** AZ-900 – Azure Fundamentals (2025).

Skills

- Languages: **C#**, **JavaScript** / **TypeScript**, **Kotlin**, **Java**.
- Frameworks: **.NET**, **React**, **Angular**, **Android Studio**,
- Databases: **PL/SQL**, **MSSQL Server**, **MYSQL**, **MongoDB**, and **CosmosDB**.
- Cloud Computing Services: **Azure**, and **GCP**.
- Architectures: **Microservices**, **Event-Driven**, **Head-Less**.
- Other Skills: **Git**, **Docker**, **Linux**. **CI/CD Azure Pipelines**.
